

Two new regulations aimed at controlling the Cuban Radio Spectrum

Source: Radio Rebelde

As of July 29th, natural persons will be able to apply for the License to Operate Private Data Networks, wireless networks and technical authorization for importing telecommunications equipment.

The engineer David Wong Sío, who is the Deputy Director of the General Directorate of Communications of the Communications Ministry, asserted that several actions have been undertaken to achieve an agile and computerized procedure in the process of applying for the Licenses, as well as in the technical authorization for importing equipment.
