Institutional Communication Office

Jorge Luis Perdomo Di-Lella, minister of communications, visited on January 19 the Computer Science Central Palace. He was accompanied by the Communications Vice-Minister, Ernesto Rodriguez Hernandez; by the Director-General of Joven Club, Osvaldo Martinez Garcia, and other officials.

They all toured the facilities that currently show a renewed image for everyone to enjoy the services that are offered there. The Minister remarked that the palace is one of the main places that show the progress made by the country regarding the implementation of the Informatization Policy. According to him, this venue also is proof of how necessary it is to introduce modern technology and of the strength of having an institution carry out activities with the community.
