The Minister of Communications visits the province of Camagüey

In a work visit to the province of Camagüey, the Minister of Communications Jorge Luis Perdomo Di-Lella, evaluated the actions in terms of e-Government and e-Commerce. In that sense he pondered that:

- It is necessary to advance more in the digitalization of the procedures so that the population has more access to the digital portals made for citizens.
 - The use of Transfermóvil for the payment of services and the digital platform EnZona has increased, but the latter must be promoted more to increase the knowledge of the functionalities it offers.
 - Keeping the digital portals for the citizen updated and incorporating attractive information.
 - In the province, work is being done on several systems for managing procedures with the participation of the branch of the Cuban Union of Computer Scientists.
-
