The Workshop on Computerization of Public Records and the Unique Citizen File was held in cooperation with the Cuban Ministry of Justice at the headquarters of the Ministry of Communications, on November 30.

The implementation of Decree Law 335/15 has a high impact on the management of procedures and services for the population; its execution is a priority of the Cuban government, in which computer scientists trained in our universities participate.

The Workshop on Public Records and the Unique Citizen File allowed the participants to discuss and share the best practices for the development and integration of public registries, as well as to increase the management of registry and notary services, with the aim of looking after the welfare of the citizens.
