The Minister of Communications, Jorge Luis Perdomo Di-Lella, paid a work visit to the company Segurmática, part of the IT and Communications Business Group (GEIC).

He toured the center's facilities together with the President of GEIC, Ariadne Plasencia Castro, and also exchanged with specialists about the projects the company is working on in 2021.

During the meeting, the development goals of the security suite for 2021 and the projection to match the national antivirus to the international state of the art were presented.

Regarding his visit, the Minister wrote on his Twitter account: Exchange on @AVSegurmatica about its Antivirus development strategy and marketing channels. Its challenge is to manage the growth of the company in the new monetary environment with the strength of having a national product resulting from knowledge #CubaInformatiza.

#CubaInformatiza #VamosPorMás
