The installation of equipment known as "Coverage Amplifiers", "4G Signal Amplifiers" or "Mobile Network Repeaters" cause drops, blockages and interferences in your calls.

The use of these means is illegal in the national territory, in addition to the fact that they are not marketed in the commercial network and do not have an approval system.

Consult the website http://www.mincom.gob.cu [1] to learn about the equipment that may or may not be imported to #Cuba.

Eliminating the interference caused by these equipment makes it possible to reach a higher percentage of benefited people.
