The Central Palace of Computer Science celebrates the 31st anniversary of its inauguration with the presence of Cuba's Deputy Prime Minister, Jorge Luis Perdomo Di-Lella; Mayra Arevich Marín, Minister of Communications, Reinaldo García Zapata, Governor of Havana, representatives of the Party and Government of Havana, directors of the Ministry of Communications and of the National Direction of the Joven Club, an exhibition is being held at the Central Palace of Computer Science and Electronics where the main novelties of the products and services that are being developed in the Capital of the Joven Club are presented, on the eve of its new anniversary.

Among the novelties presented by the Central Palace is a new version of the social network, La Tendedera, with new functionalities that include greater privacy, security and speed.

For its part, the EcuRed Collaborative Encyclopedia presents its access through QR code and the inclusion of audio and multimedia within its contents.

Among the activities was the tour around the Educational Robotics Laboratory, where it was possible to interact with children who belong to the Robotics workshop who presented their knowledge on the subject. Within this space, the printed edition of the magazine Tino in its special edition dedicated to robotics was also presented to the attendees.

The Central Palace of Computer Science is celebrating its 31st anniversary this March 7, fulfilling the vision of the future of our historic leader, Fidel Castro Ruz.
